PROFESSIONAL SUMMARY

Senior product designer with 10 years across UI/UX and product, currently leading product and design at an AI-first hospitality startup. Shipped agent and operational products across five verticals from zero. Built design systems from scratch, drove a team-wide migration to Figma, and bridged design with product strategy and engineering. Healthcare EHR background. SAFe Agile Expert. Multilingual.

PROFESSIONAL EXPERIENCE

Director of Product, Lycia AI

2023 – Present

San Diego, CA

- Lead end-to-end product design and strategy for an autonomous AI agent platform deployed across hotels, airports, malls, restaurants, and offices.
- Designed agent UI surfaces across WhatsApp, SMS, voice, and web — pre-arrival flows, sentiment-aware escalation banners, multilingual handoff, and persistent guest memory.
- Designed and shipped a 21-page operational PMS demo (~25,000 lines of code, custom design system, AI-first inbox with auto-drafted replies, multi-staff auto-assign with on-duty filtering and load balancing, automation rules, integrations directory).
- Built a 10-step customer-journey storyboard ("The Beau") used in B2B sales conversations, covering booking through one-year re-engagement.
- Established design-engineering collaboration via Figma component libraries, prototyping standards, and cross-functional design-review cadence.
- Drove the AI-first product positioning vs FAQ-chatbot competitors (Hijiffy, Quicktext, Asksuite); architectural choices in the inbox, data model, and auto-assign system became the differentiation.

UI/UX Designer, Clinicomp

February 2021 – 2023

San Diego, CA · Healthcare EHR

- Advocated for and led the design team's transition to Figma — replaced a fragmented tool stack and improved designer-engineer iteration time.
- Worked daily with clinical experts to design and improve EHR applications — wireframes, interactive prototypes, and clinical workflow tutorials.
- Co-built a new design system that preserved brand continuity while phasing out outdated UI; rolled out to existing customers gradually to minimize disruption.
- Improved cross-team communication between engineers and designers, increasing efficiency and output across product squads.

UI/UX Designer, Remedy

May 2019 – July 2020

San Francisco Bay Area · Healthcare EHR

- Designed across the medical product suite — CRM, EHR, patient encounter system, calendar manager — for web (.NET) and mobile (iOS and Android patient app).
- Owned interaction and visual design end-to-end, from concept through development through in-market support.
- Conducted user research with practicing clinicians to validate workflows and prioritize feature improvements.

Lead UI/UX Designer (Contract), Kizen

November 2018 – April 2019

Remote · AI-supported CRM SaaS

- Researched CRM industry practices, explored product ideas via mockups and interactive prototypes, and conducted usability testing to converge on top solutions in the early development phase.
- Set foundational design direction for the early-stage product.

Graphic Designer & Digital Marketer, Spieth America

February 2017 – August 2018

Lansing, MI · Olympic Sports Products

- Worked with US Olympic athletes to create and promote gymnastics products; built sub-brands, marketing materials, and annual product catalogs (2017, 2018).
- Owned promotional collateral for athletic competitions and trade shows.

EDUCATION

Saginaw Valley State University, Michigan · Bachelor of Arts in Graphic Design · December 2016

Dean's List 2013–2016

CERTIFICATIONS

SAFe Agile Expert · Scaled Agile, Inc. · 2021

SKILLS

Design Tools: Figma, Sketch, InVision, Adobe XD, Photoshop, Illustrator, InDesign, Dreamweaver, After Effects.

Design Systems & Practice: component libraries, design tokens, accessibility (WCAG, focus-visible, keyboard navigation), prototyping, user research, usability testing, design operations, design review cadence.

Front-End: HTML, CSS.

Methodologies: Agile, Scrum, SAFe, Lean UX, design thinking, jobs-to-be-done.

Domains: AI / agentic AI / LLM products, hospitality, healthcare EHR, SaaS, B2B, B2C, mobile, web, e-commerce, CRM.
