### PROFESSIONAL SUMMARY

---

Senior product designer with 9 years across hospitality AI, decentralized clinical trials, healthcare EHR, and consumer apps. Currently Director of Product at Lycia AI. Most recent design role: Senior Product Designer at Science 37, where I designed an AI-integrated scheduling system with \$1.7–3.2M/yr modeled scheduler-side capacity reclaim. SAFe Agile Expert. Multilingual.

### PROFESSIONAL EXPERIENCE

---

#### Director of Product, Lycia AI Solutions

April 2024 – Present

San Diego, CA · Remote

- Conducted user research interviews with hotel general managers to understand operational problems at depth; insights uncovered undervalued, high-potential product directions that lifted sales conversion.
- Reshaped the company's hospitality AI product through design-led projects focused on revenue generation for hotels — agent UI surfaces, in-product upsell flows, and partner-network surfaces.
- Designed agent UI surfaces across WhatsApp, SMS, voice, and web — pre-arrival flows, sentiment-aware escalation banners, multilingual handoff, persistent guest memory.
- Designed and shipped a 21-page operational PMS demo (~25,000 lines of code, custom design system, AI-first inbox with auto-drafted replies, multi-staff auto-assign with on-duty filtering and load balancing).
- Optimized product demos, sales pitches, and customer-facing presentations — tailored by hotel segment to support higher sales conversion.
- Drove AI-first positioning vs FAQ-chatbot competitors; architectural choices in the inbox and data model became the company's product differentiation.

#### Senior Product Designer, Science 37

February 2023 – March 2024

San Diego, CA · Remote · Decentralized Clinical Trials

- Designed an AI-integrated scheduling system that automatically optimized the schedules of hundreds of nurses, doctors, and other providers across 4 active clinical trials.
- System assigned multi-role staff to off-site patient appointments, calculated travel times, and routed required kits and supplies in advance — **\$1.7–3.2M/yr modeled scheduler-side capacity reclaim** from slice-based occupancy and drive-aware routing.
- Designed the auto-suggest scheduling flow with kit-readiness as a hard rule, continuity-of-care matching for participants, and licensure / drive-time / role-eligibility checks.
- Built the day-optimization explainability UI ("Why this pick?") surfacing the binding constraint per appointment — kit, continuity, licensure, or drive distance — to build clinician trust in AI-driven scheduling.
- Owned design-engineering collaboration in a SAFe-aligned cadence; rebuilt component library and prototype-driven review process.

#### Product Designer, Vault Health

June 2022 – February 2023

San Diego, CA · Decentralized Clinical Trials

- Designed product workflows for Vault Health's decentralized clinical trials platform — patient onboarding, study coordinator tooling, and clinical data capture surfaces.
- Partnered with clinical operations and engineering to translate trial-protocol requirements into shipped product.

## UI/UX Designer, CliniComp

February 2021 – June 2022

San Diego, CA · Healthcare EHR

- Led the design team's transition to Figma — replaced a fragmented tool stack and improved designer-engineer iteration time and review velocity.
- Worked daily with clinical experts to design and improve EHR applications — wireframes, interactive prototypes, and clinical workflow tutorials.
- Co-built a new design system that preserved brand continuity while phasing out outdated UI; rolled out to existing customers gradually to minimize disruption.

## UI/UX Designer, Remedy

June 2019 – July 2020

San Francisco Bay Area · Healthcare EHR

- Designed across the medical product suite — CRM, EHR, patient encounter system, calendar manager — for web (.NET) and mobile (iOS, Android patient app).
- Owned interaction and visual design end-to-end; conducted user research with practicing clinicians to validate workflows.
- Implemented a new design system and UI library to update the existing user interface, partnering with product management, engineering, business stakeholders, and third-party vendors.

## Graphic Designer, SPIETH America

February 2017 – August 2018

Greater Lansing, MI · Olympic Sports Products

- Worked with Olympic athletes to create and promote signature product lines through social media and online marketing.
- Designed multi-channel campaigns (web, digital, printed collateral); annual product catalogs (2017, 2018) and event materials. Drove brand awareness and equity through visually engaging work.

## EDUCATION

---

**Saginaw Valley State University**, Michigan · Bachelor of Arts in Graphic Design · December 2016

Dean's List 2013–2016

## CERTIFICATIONS

---

**SAFe Agile Expert** · Scaled Agile, Inc. · 2021

## SKILLS

---

**Design Tools:** Figma, Sketch, InVision, Adobe XD, Photoshop, Illustrator, InDesign, Dreamweaver, After Effects.

**Design Systems & Practice:** component libraries, design tokens, accessibility (WCAG, focus-visible, keyboard navigation), prototyping, user research, usability testing, design operations, design review cadence.

**Front-End:** HTML, CSS.

**Methodologies:** Agile, Scrum, SAFe, Lean UX, design thinking, jobs-to-be-done.

**Domains:** AI / agentic AI / LLM products, hospitality technology, decentralized clinical trials (DCT), healthcare EHR, SaaS, B2B, B2C, mobile, web, e-commerce, CRM.
