PROFESSIONAL SUMMARY

Product manager with a hybrid product-and-design background. Currently Director of Product at Lycia AI — reshaped the hospitality AI product around revenue generation, drove customer development, and created multiple new revenue pipelines. Previously Senior Product Designer at Science 37, where I designed an AI scheduling system with \$1.7–3.2M/yr modeled scheduler-side capacity reclaim. SAFe Agile Expert. Multilingual.

PROFESSIONAL EXPERIENCE

Director of Product, Lycia AI Solutions

April 2024 – Present

San Diego, CA · Remote

- Conducted customer-development interviews with hotel general managers; uncovered undervalued, high-potential product opportunities that lifted sales conversion.
- Reshaped the hospitality AI product strategy by spearheading revenue-focused projects — expanding the product from chat layer to a revenue engine for hotels.
- Created multiple new revenue pipelines from non-hotel sources (partner verticals — restaurants, music venues, activities) that compound on each new hotel deployment.
- Optimized product demos, sales pitches, and presentations — tailored by hotel segment (boutique vs chain, by ADR tier, by region) to lift sales conversion.
- Authored 40-page hotel AI market analysis (AHLA, STR/CoStar, Cornell, Oracle, Phocuswright, Skift, PolyAI) used in sales, fundraising, and product roadmap.
- Defined pricing strategy across two SKUs (\$10/room/month flat and \$0 + commission); competitive playbook vs Mews, Cloudbeds, Hijiffy, Quicktext, Asksuite, Canary, PolyAI.
- Authored 18-page strategic thesis on the U.S. independent-hotel expansion (\$288M SAM, 12,000 addressable properties) with TAM/SAM/SOM and 36-month plan.

Senior Product Designer, Science 37

February 2023 – March 2024

San Diego, CA · Remote · Decentralized Clinical Trials

- Owned product design for an AI-integrated scheduling system that automatically optimized the schedules of hundreds of nurses, doctors, and other providers across 4 active clinical trials.
- System assigned multi-role staff to off-site patient appointments, calculated travel times, and routed required kits and supplies in advance — **\$1.7–3.2M/yr modeled scheduler-side capacity reclaim** from slice-based occupancy and drive-aware routing.
- Translated Science 37's stated operational disclosures (kit logistics, continuity-of-care matching, FTE / per-diem staffing, multi-state licensure) into hard scheduling rules in the product.
- Partnered with clinical-ops product owners and engineering to translate trial-protocol requirements into shipped product.

Product Designer, Vault Health

June 2022 – February 2023

San Diego, CA · Decentralized Clinical Trials

- Designed product workflows for Vault Health's decentralized clinical trials platform — patient onboarding, study coordinator tooling, and clinical data capture surfaces.
- Partnered with clinical operations and engineering to ship trial-protocol-aligned product features.

UI/UX Designer, CliniComp

February 2021 – June 2022

San Diego, CA · Healthcare EHR

- Partnered with product managers and clinical subject-matter experts on EHR workflows; turned clinical research into shipped designs.
- Led the team's tooling migration to Figma; reduced designer-engineer iteration time and improved review velocity.
- Co-built a new design system rolled out without breaking existing customer workflows.

UI/UX Designer, Remedly

June 2019 – July 2020

San Francisco Bay Area · Healthcare EHR

- Owned product design across CRM, EHR, patient encounter, and calendar manager modules — for web (.NET) and mobile (iOS, Android).
- Implemented a new design system and UI library; partnered with product management, engineering, business stakeholders, and third-party vendors to update the existing user interface.
- Drove user research with practicing clinicians; recommendations directly shaped product priorities.

Graphic Designer, SPIETH America

February 2017 – August 2018

Greater Lansing, MI · Olympic Sports Products

- Worked with Olympic athletes to promote signature product lines through social media, online marketing, and multi-channel campaigns (web, digital, print). Designed annual product catalogs (2017, 2018) and event materials.

EDUCATION

Saginaw Valley State University, Michigan · Bachelor of Arts in Graphic Design · December 2016

Dean's List 2013–2016

CERTIFICATIONS

SAFe Agile Expert · Scaled Agile, Inc. · 2021

SKILLS

Product Management: product strategy, roadmap planning, customer development, customer interviews, market sizing (TAM/SAM/SOM), competitive analysis, pricing strategy, go-to-market (GTM), persona definition, OKRs, KPIs, prioritization (RICE, MoSCoW), product requirements documents (PRDs).

Methodologies: Agile, Scrum, SAFe, Lean Startup, design thinking, jobs-to-be-done, A/B testing, hypothesis-driven development.

Tools: Figma, Notion, Linear, Jira, Confluence, GitHub, Google Analytics, basic SQL, spreadsheet modeling.

Domains: AI / agentic AI / LLM applications, hospitality technology, decentralized clinical trials (DCT), healthcare EHR, SaaS, B2B, B2C, mobile, web, CRM.
